PROJECTION  
SCREENS  
GET THE BIG  
PICTURE

AT

Multibrackets we get the Big Picture. We know TVs are great, but if you want to make really epic presentation or watch entertainment the way it was supposed to, you need a projection screen. One-hundred-plus inches of high-definition awesomeness. The way to present and the way to watch is way more important than most people think. As they say - there is just one time to make a first impression, and we want that to be a great one, whether it is a company presentation or watching the game with your friends. Our series of projection screens are built to deliver and adds flexibility and real quality to your set up. Designed in Stockholm, Sweden to provide outstanding performance with a sleek and streamlined outlook, it gives your visitors the impression you want to leave behind. With one of the largest selections available our screen solutions are ideal for public, office and home use.

# MANUAL PROJECTION SCREEN DELUXE

## ELEGANT DESIGN & SUPERIOR MATERIAL CHOICES

Multibrackets Manual Self-Lock Projection Screen Deluxe are elegant projection screens designed with a aluminium cassette, high-end for the living room, home theatre, conference rooms or for educational use in schools. With a sleek Nordic design this projection screen fits any environment it is installed in.

**T**he Multibrackets Projection Screens are easy to install and even easier to use. Just sit back and enjoy the show! Non compromised material choices is used when making a Multibrackets Manual Screen giving you market leading technical specifications, and optimized picture quality.

### Slow retention

A slow retention function is built into the manual screens. This makes the screen retract slowly, and controlled retract into the cassette. This prolong the lifetime (normally doubles the life expectancy) of the projection screen and makes the manual screen usable in more public environments where

multiple users handle the screen every day.

### Superior screen material

The quality of screen material is the most important aspect of any projection screen. Most screens on the market will use a very basic compressed cloth type material resulting in a creased surface and poor contrast performance. The Multibrackets Projection Screen Deluxe series use a high quality multi ply material with a high contrast and low gain of 1.0. The material is tear resistant, fireproof, anti wrinkle safe and is designed to hang flat. The centre layer is a glass fibre net producing a flex rate of less than 1% compared with the industry average

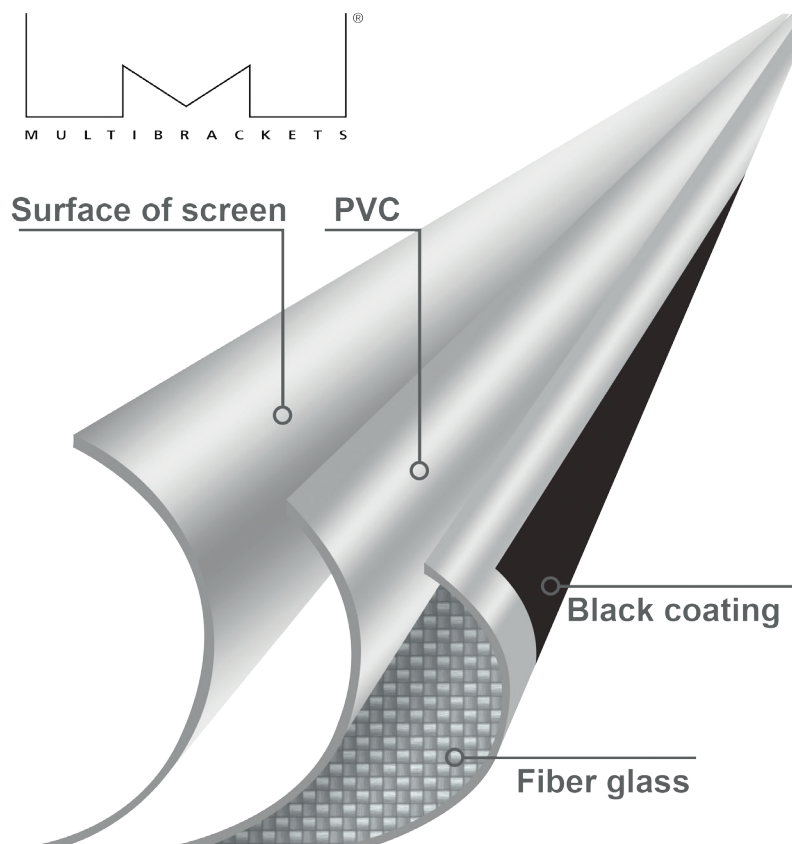

of 33%. The front layer optimizes contrast and reflectivity while a black PVC backing prevents light leakage and helps retain a uniformly flat projection surface.

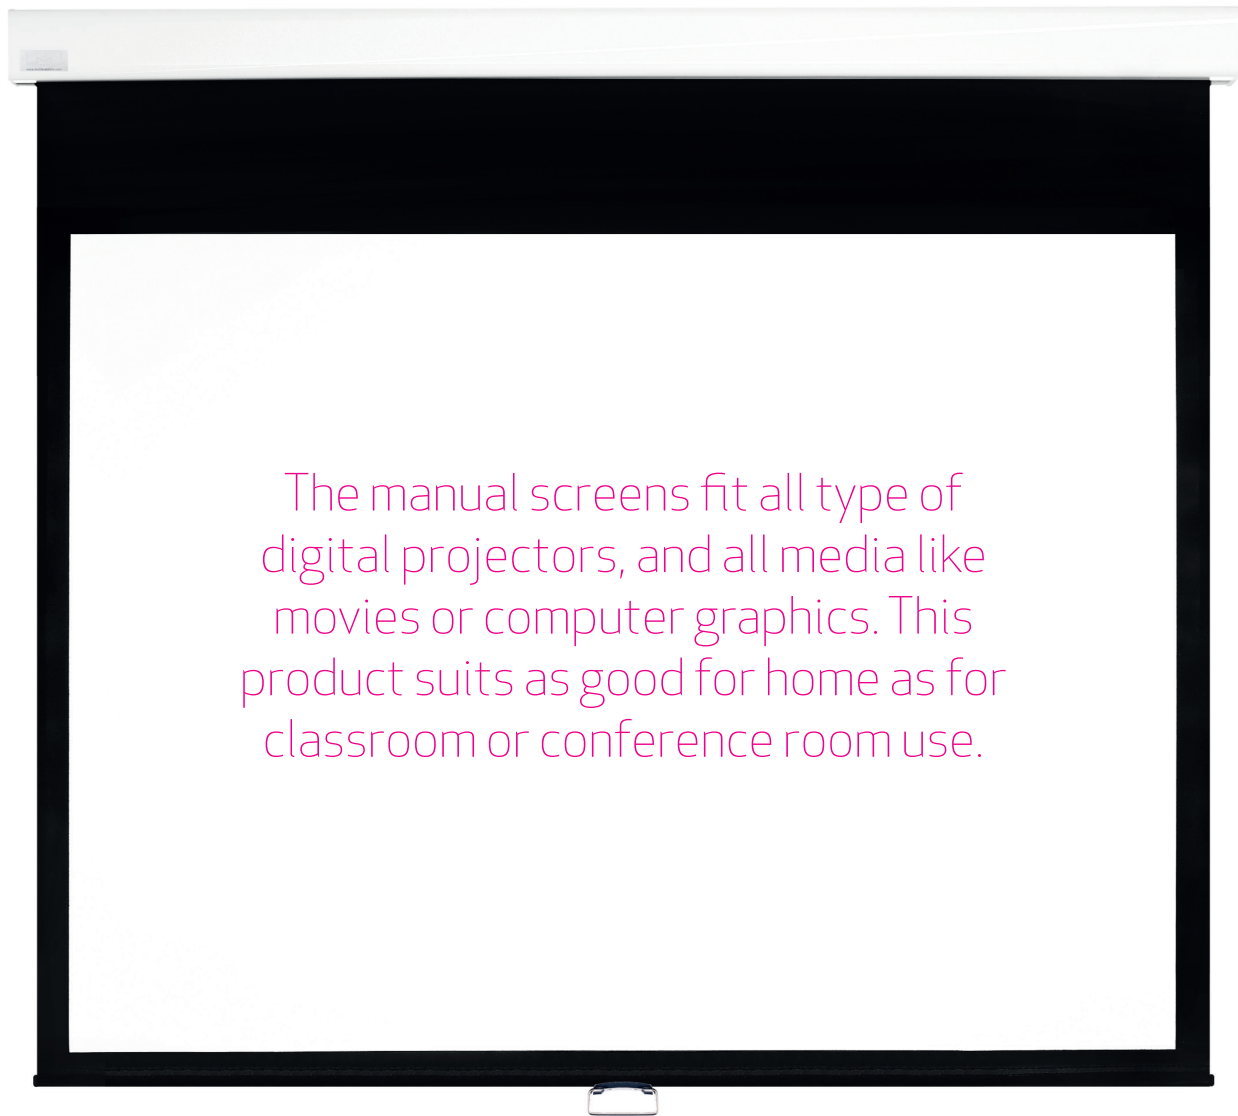

### Elegant design

Multibrackets Manual Self-Lock Projection Screens Deluxe are elegant series of manual screens. The cassette is all aluminium coated in white paint. High quality details & superior design makes this piece a beauty among projection screens.

### Formats

Available in 16:10, 16:9, 4:3 or 1:1-formats surrounded by a black boarder for contrast.

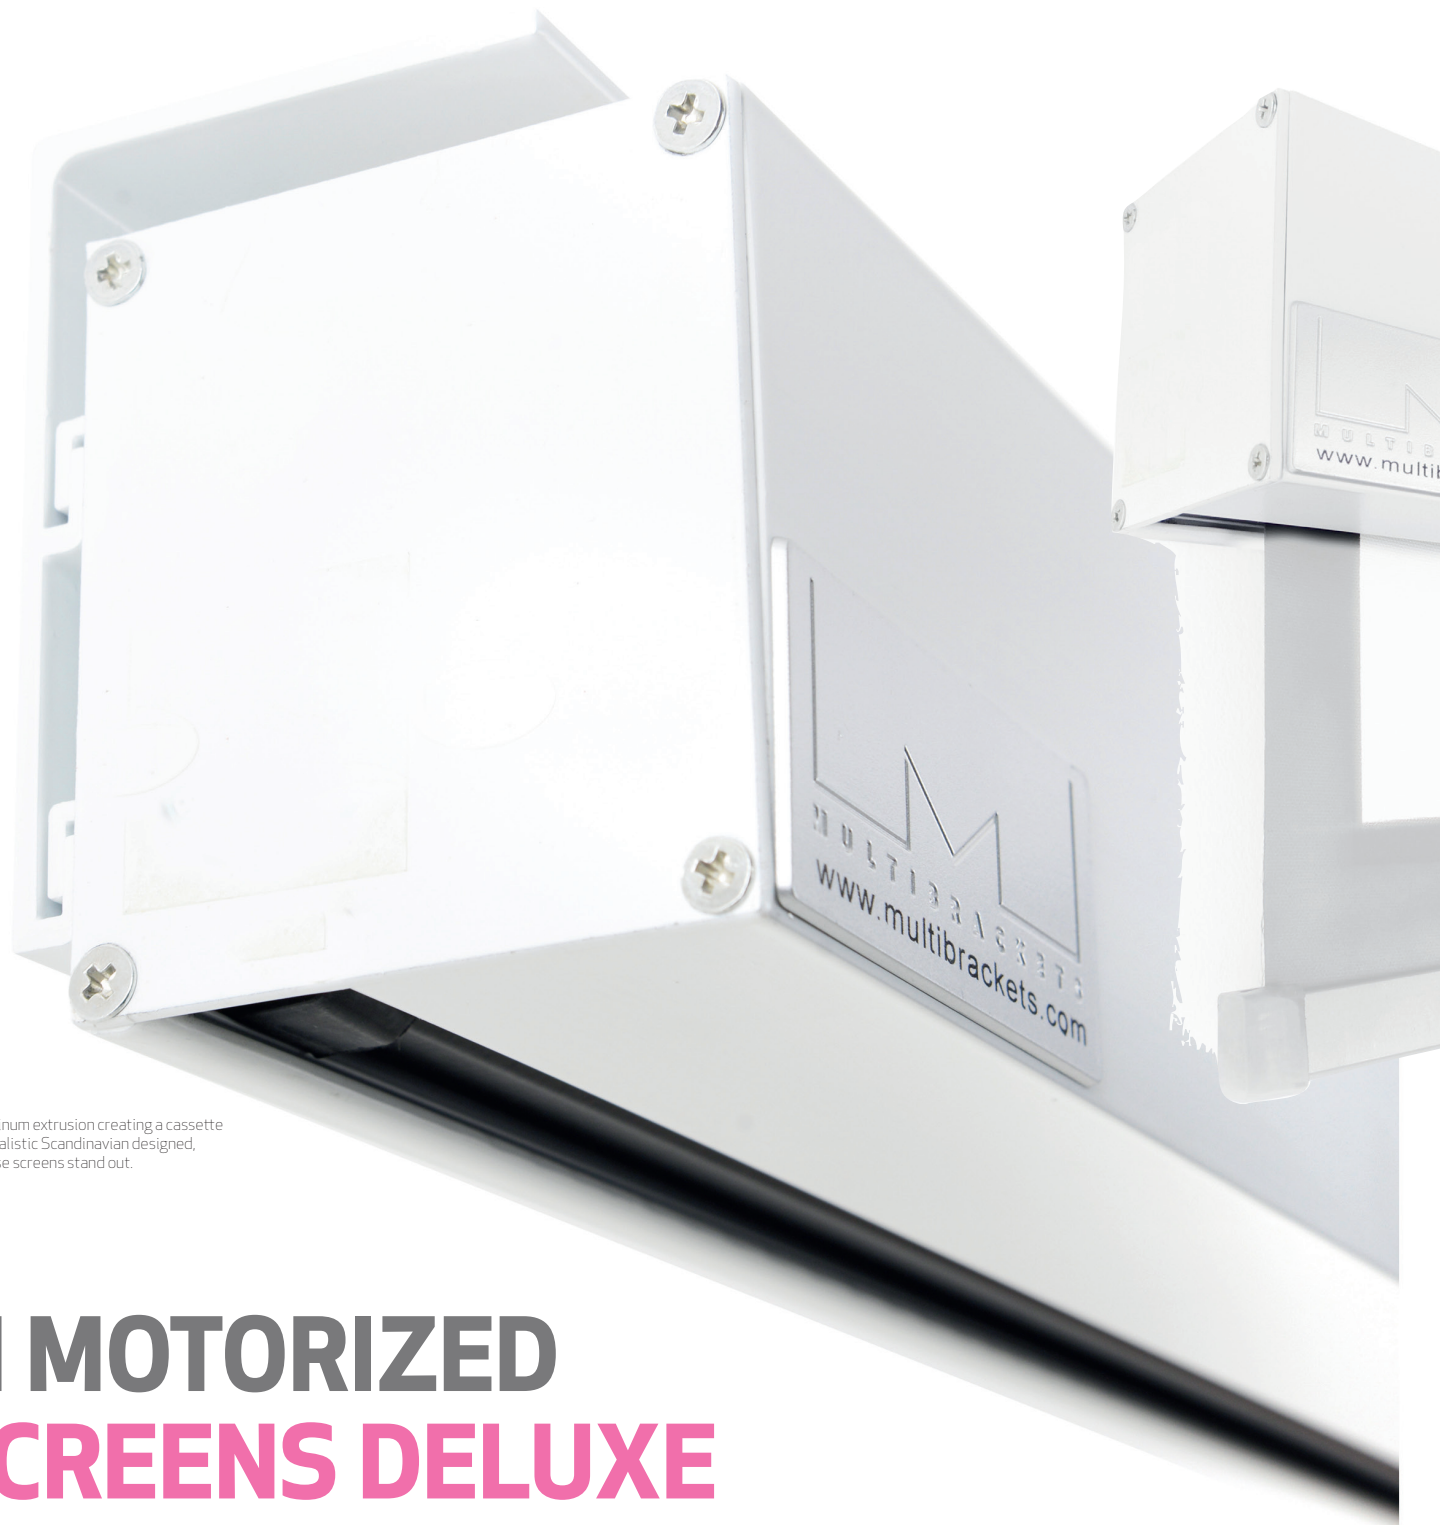

The manual screens fit all type of digital projectors, and all media like movies or computer graphics. This product suits as good for home as for classroom or conference room use.

# M MOTORIZED SCREENS DELUXE

Our motorized projection screens are designed to increase functionality and performance for today's presentation environments. Also by being motorized and not handled by hand it will last much longer than its manual counterparts. Crafted to strict Multibrackets standards, these innovative screens are now available in widths from 77" to a massive 334" (or 8,5m diagonal).

Multibrackets M Motorized Screens Deluxe are equipped with a unique 3-layer projection screen fabric giving a superior flat-hanging screen fabric compared with any other brand in its class.

**M**ultibrackets Motorized Screens also feature seamless height adjustments for a picture perfect reproduction in the most challenging environments. Multibrackets standard fabric is a Gain 1.0 and our screen cloth is using a high leveled three layer technology. Multibrackets can also custom produce screens with different fabrics built to a project's specification.

Supporting most popular aspect ratios: 16:9, 16:10, 4:3, and 1:1 we are almost cer-

tain we have a Motorized Projection Screen that fits your needs.

## Superior screen material

The quality of screen material is the most important aspect of any projection screen. Most screens on the market will use a very basic compressed cloth type material resulting in a creased surface and poor contrast performance. The Multibrackets Motorized Projection Screen Deluxe series

use a high quality multi layered ply material with a high contrast and low gain of 1.0. The material is tear resistant, fireproof, anti wrinkle safe and is designed to hang flat. The centre layer is a glass fibre net producing a flex rate of less than 1% compared with the industry average of 33%. The front layer optimizes contrast and reflectivity while a black PVC backing prevents light leakage and helps retain a uniformly flat projection surface.

The Square-shaped case of the Multibrackets motorized screens offers a stylish solution for design-sensitive installations.

All inclusive. Possible to mount to wall, or in ceiling. Hardware included.

All Multibrackets electric projector screens Deluxe are equipped with a black border and some models can also be ordered with a black case.

# FRAMED PROJECTION SCREENS

Our ultra flat framed screens reach a perfectly smooth surface. With a frame that is just 30 mm thick, it looks rather like an LCD than a projection screen. It's simple and linear shape harmonizes beautifully. Available from 77" to massive 226".

**O**ur Framed series is a best seller in EU perfect for Boardrooms, Corporate Information Suites, Reception areas and other prestige business locations. Our line of framed screens are also perfect for smaller viewing theatres, visitor centers, museums and other select presentation venues.

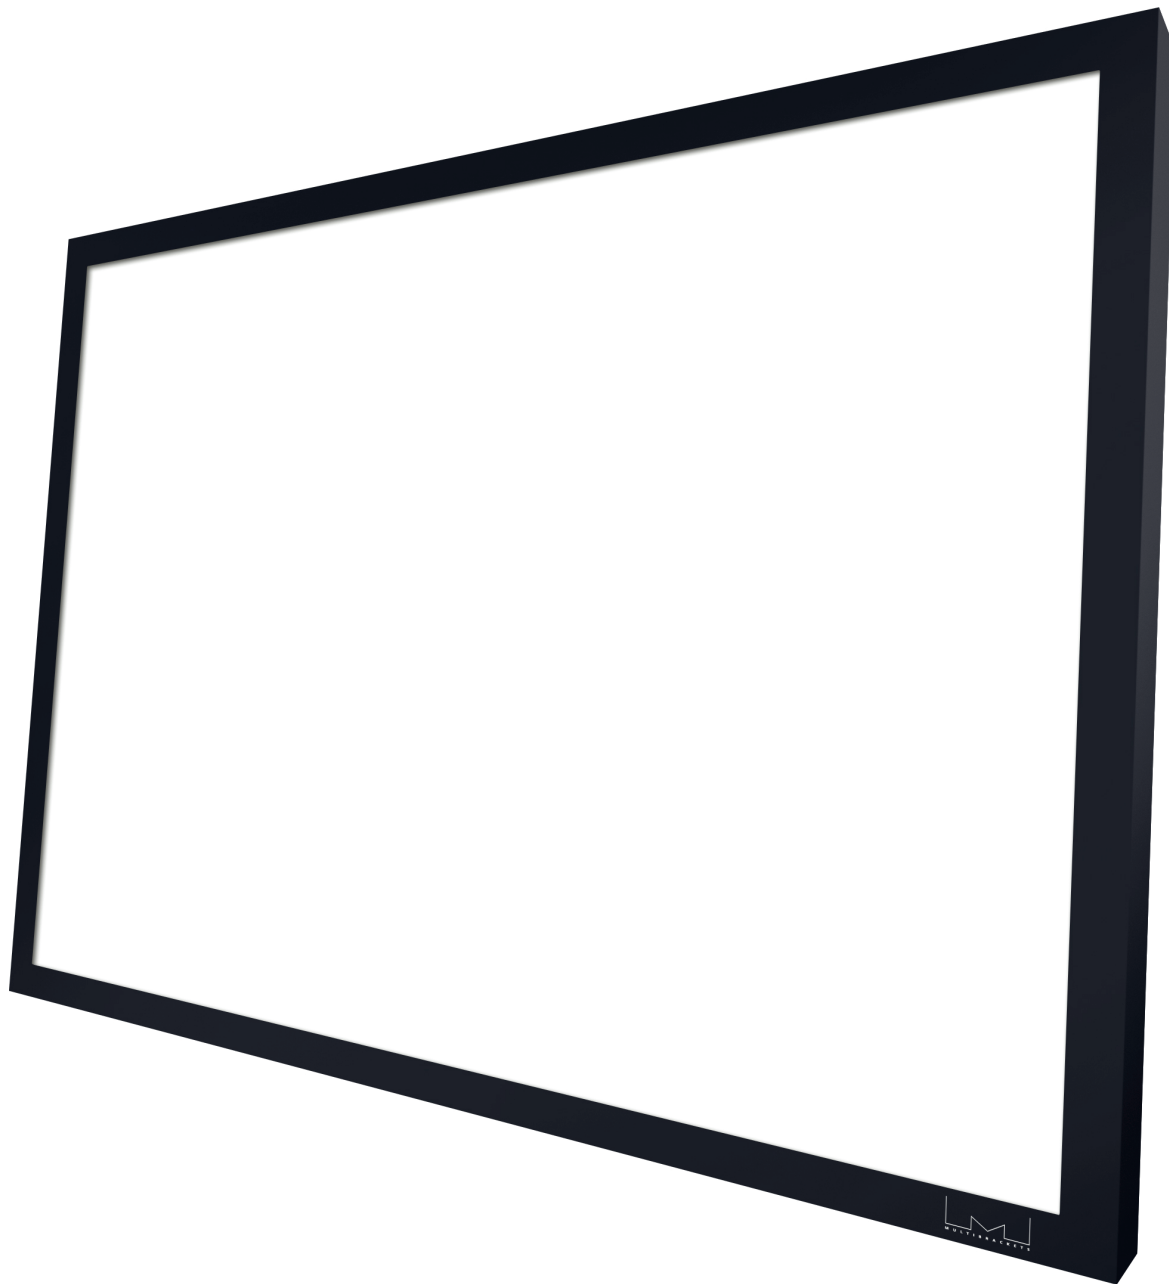

The screens are based on a high quality screen cloth. Producing a 1.0 gain with a

superior extra wide viewing angle. Our Framed screens use a simply ingenious tensioning system, you're sure to get a wrinkle-free and super straight image every time.

Multibrackets framed screen value means big audiences get big screens without having to compromise on the experience. The result is a viewing environment that delivers on movie makers creative

vision. A result so immersive, it must be experienced.

Our series Fixed projection screens are tailored to fit the bill for high-end fixed screens and viewers wanting high quality and good economy. Selected framed screens has the option to use Multibrackets Grey Plus Cloth (Gain 0.9) or our Acoustically transparent screen technology.

# INSTALLING A FAST FOLD SCREEN ON STAGE

The rental industry is the ultimate test for the reliability and quality of any AV Equipment. Multibrackets Fast Fold screens are used by rental companies throughout EU every day.

# M UNIVERSAL PROJECTOR CEILING SERIES MOUNTS WITH FINE TUNE TECHNOLOGY

Multibrackets is now shipping a full range of ceiling projector mounts designed to cut install time and get the perfect picture in no time. The new design incorporates fine tune technology making it possible to orient and incline according to several axes making the end viewing result perfect.

The built in fine tune technology provides easy fingertip positioning capabilities which automatically adjusts the projectors position. That way you can always be sure to get a well balanced position for your projector after installing it. This does not only save installation time but also make room for possible changes of what projector is being used or how your projection screen is positioned, perfect if you anticipate changing projectors in the future. The arms holding the projector are articulated and telescopic to adopt to almost all projector models.

#### SPECIFICATION M Universal Projector Ceiling Mount 200 with Fine tuneArticle

Suitable for:	Projectors
